

## CMCD PARTICIPATES IN 2004 SWAMP BUGGY DAY PARADE

Through the efforts of several Collier Mosquito Control District (CMCD) employees, a 9 ft. by 30 ft. parade float was constructed to communicate CMCD's presence in the District community. The float is lead by a 1/4 scale model of a Short Brothers Skyvan, the airplane used by the CMCD, mounted on a 12 ft. pole with a horde of nuisance mosquitoes flying over green foliage.

With hundreds of Naples residents attending the parade, it provides a great opportunity to hand out promotional items and informational brochures while having lots of fun. This is the second year that the CMCD has entered a parade float in the annual parade. This year the CMCD float won the "Grand Marshall Entry" award.
